Projects

Personal Website
Built in Django in order to post my small web apps.

Python
Django
HTML

WLP4 Compiler
A compiler for a small subset of the C/C++ languages, built for CS241 as the main class project.

C
C++
Git

Interests & Extracurriculars

Rock Climbing
I joined the Outers Club in Waterloo in February 2014. I primarily focus on bouldering, and since starting I've advanced to a v2/v3 level.

Board Games
I fell in love with collecting board games back in high school, where me and my friends would play on breaks. I often attend weekly board game nights at the University.
